

**CHRIST HIGH SCHOOL PLOT 5, CHS
STREET, KM 32, ABUJA-KEFFI ROAD
UKE, NASARAWA STATE**

**FIRST TERM
EXAMINATION 2024/2025
ACADEMIC SESSION**

**SUBJECT: PVS
CLASS: JSS2
TIME: 2 Hours**

NAME.....

CANDIDATE'S ADMISSION NO.

INSTRUCTION

**Write your name and number in the space
provided on your answer booklet. Write
your name on any extra sheet used.**

Answer all questions.

**At the end of the examination, staple all
your work securely together.**

FOR EXAMINER'S USE	
Total Score:	+

PVS A: AGRICULTURAL SCIENCE

1.The following are example of storage farm structure except

- A. Barn
- B. Silo
- C. Rhombus
- D. Maize crib
- E. Paddock

2.A crop is harvested when it

- A. Matures
- B. Flowers and fruits
- C. Fruits become ripe
- D. All of the above
- E. Growing

3._____ are buildings used for raising livestock such as cattle, sheep, goats and pigs.

- A. Pens
- B. Rhombus
- C. Silo
- D. Maize crib
- E. Fish pond

4.Which of the following is a farm building?

- A. crib
- B. hutch
- C. paddock
- D. rack
- E. store

5.One of the following is not a farm structure

- A. Barn
- B. silo
- C. Store

- D. well
- E. Paddock

6. Poultry houses are used for keeping

- A. Broilers
- B. Pigeons
- C. Rabbits
- D. Snails
- E. Goats

7. Which of the following is a production farm structure?

- A. Paddock
- B. Maize crib
- C. Barn
- D. Silo
- E. Rhombus

8. Farm structures are classified based on the following except

- A. Storage
- B. Production
- C. Processing
- D. Paddock
- E. Maintenance and services

9. Which of the following storage structures is a correct match to the corresponding farm produce?

- A. Barn - fruits
- B. Crib - tubers
- C. Drum - spices
- D. Rhombus - vegetables
- E. Silo - grains

10. The two types of crops propagation are

- A. Biotic and abiotic propagation
- B. Abiotic and sexual propagation

- C. Sexual and biotic propagation
- D. Asexual and sexually propagation
- E. Asexual and abiotic propagation.

11.A temporary structure constructed for the storage of yam is called

- A. Paddock
- B. Pond
- C. Crib
- D. Barn
- E. Silo

12.A farm office is an example of a ----- on a farm

- A. Temporary building
- B. Permanent building
- C. Soft building
- D. Document building
- E. Storage building

13.Which of these is not a way of maintaining farm structures

- A. Closing cracked walls, roof leaks.
- B. Coating timber with fire retardant
- C. Polishing the farm structures
- D. Cutting tall trees around the farm.
- E. Planting more trees.

14.Early harvesting of crops is beneficial because it

- A. Guides against crop failure
- B. Improve the taste of crop
- C. Increase seed viability
- D. Minimize wastage
- E. Reduce the income of farmers

15.Vegetative propagation is used to produce

- A. Cassava
- B. Cowpea

- C. Maize
- D. Millet
- E. Bean

16. All of these are vegetative methods of propagation except _____

- A. Layering
- B. Tapping
- C. Cutting
- D. Budding
- E. Grafting

17. Maize plants raised from seeds

- A. All look exactly alike
- B. Have two cobs each
- C. Are tall, while some are short and others are of medium size
- D. Have very high yields
- E. Have very poor yields

18. _____ are cylindrical structures built and covered with mud and thatched roof

- A. Rhombus
- B. Barn
- C. Pen
- D. Pond
- E. Silo

19. All these are characteristics of seeds to be propagated except

- A. Hardiness
- B. Early maturing
- C. Highly viable
- D. Powdery and light
- E. High yield

20. Rice is propagated by

- A. budding

- B. grafting
- C. layering
- D. marcotting
- E. seedling

21. Which of the following crops can be propagated vegetative?

- A. Maize
- B. Beans
- C. Coconut
- D. Groundnut
- E. Cassava

22. The following are crops propagated by seeds except

- A. Rice
- B. Millet
- C. Maize
- D. Groundnut
- E. Yam

23. The methods of increasing the number of crops or plant is called

- A. Propagation
- B. Cutting
- C. Tilling
- D. Supplying
- E. Ploughing

24. Storage tank manufactured locally with galvanized sheet contains how many liters of water

- A. 2,350 liters
- B. 2,250 liters
- C. 1,250 liters
- D. 1,350 liters
- E. 2,150 liters

25. The main reason for painting metal pillars used in farm building is to -----

- A. Attract visitors to the farm
- B. Decrease their life span

- C. Differentiate them from other parts
- D. Increase cost of production
- E. Prevent rust

SECTION B: ESSAY

Answer any two questions

- 1a. Define crop propagation 2marks
- b. Explain the two methods of crop propagation 3marks
- 2a. Define farm structure 2marks
- b. Enumerate three examples of storage farm structures. 3marks
- 3a. List two uses of farm buildings 2marks
- 3b. State the method of propagation of the following crops:
 - i. Cassava
 - ii. Maize
 - iii. Rice 3marks

1a. state the uses of the following farm structures and building

- i. Barn
- ii. Stores
- iii. Battery cage
- iv. Fish pond
- v. Residential building
- vi. Workshop

1b. Explain four ways farm structures and buildings can be maintained.

2a. List 5 forms of vegetative propagation and explain one.

2b. Define crop propagation and list its types

3a. list 5 advantage and disadvantage of sexual propagation

3b. list 5 advantage and disadvantage of asexual propagation.

PVS B: HOME ECONOMICS

ANSWER ANY 2 QUESTIONS

1a. Define the term 'clothing'. (1mark)

b. State four types of household linen. (2marks)

c. Explain two guidelines for caring for clothes. (2marks)

2a. Define stain. (1mark)

b. State two types of pattern drafting. (2marks)

c. Mention four
